

ARYANI SARI RAHMANTI

cv and
portfolio

Aryani Sari Rahmanti (Sari) is a native of Indonesia. She graduated in 2003 as an architecture engineer from Bandung Institute of Technology (ITB), Indonesia. In 2008, she decided to follow post-masters programs at KU Leuven. Sari completed Master of Human Settlements (cum laude, 2009) and Master of Urbanism and Strategic Planning (magna cum laude, 2011).

During her studies in Belgium and since then, she has been practicing as an urbanist and working on various projects and researches in different contexts. Her scope of work varies: masterplan design for (brownfield) mixed use developments, healthcare and leisure facilities; public parks and playground design principals; development strategies; design process facilitator with participation sessions; and spatial design guidelines for planning policy.

Her approach values the importance of human scale, elevates the use of soft mobility network, pursues the revitalization of public spaces and neighborhood, sustainability aspects; and offers the current and future users to be involved in the design process to genuinely answer their specific needs.

As additional activities, she was the major part of the organizing committees for international conferences and public lectures on architecture and urbanism of Indonesia in Europe.

Through her interests and works, Sari's ambition is to give positive and sustainable impacts on the society and environment, and to offer concrete actions on mitigating the climate change challenges.

APPROACHES AND FOCUS AREAS

THE IMPORTANCE OF HUMAN SCALE

Regardless the scale of the projects, Sari finds it very important to herself to **value the human scale** when designing so that an environment and neighborhood that is **comfortable, safe**, setting up **closeness** and promoting **social cohesion**, rich of **experience, livable** and **animated neighborhood** can be created.

SOFT MOBILITY ENCOURAGEMENT

Sari underlines the **important use of soft mobility network** (slow mobility network for all types of pedestrians, public transport, bicycle network, car and bike sharing and creating neighborhoods that are safe and have limited vehicle access) and **traffic restructuring**. Her wealth of knowledge on green and soft mobility enhancement has been benefiting not only in **reducing pollution** but also offering **better living quality** to the environment in all her projects.

PROVIDING SPACE FOR GREEN AND BLUE

Providing an **adequate space for green and water** is not only helping creating a qualitative space, but also a **healthier community**, an environment with **richer biodiversity**, and **resilience improvement to climate change challenges**. While designing masterplans, Sari's starting point begins with open space analysis and reservation to guide the built environment.

BOTTOM-UP PARTICIPATION

In the design process, Sari offers possibilities **to engage the current (and future) users**. Each project has its own unique ambitions as well as the users' needs. By giving the ideas and input from the users, the results are design proposals that are adjusted to **specifically suit their requirements** and can **optimally meet the goals**.

POSITIVE AND SUSTAINABLE IMPACTS

In all her projects, Sari always orients towards **long-term goals** and utilize her knowledge about the **environmental consequences**. Limiting building footprints, more open spaces for combined function of leisure-biological diversity-water absorption areas, reviving brownfields and residual spaces, green mobility enhancement, place making for social cohesions, sustainable investment and so on... It is her main ambition that, through her works, she can give **positive and significant impacts** on the **society, economy** and the **environment**.

KNOWLEDGE SHARING

Sari holds a strong educational and professional background obtained from her studies and works. Her aspiration is to **pass on her experiences** with people who share same interests through lectures, exhibitions, publications and talks, to move together toward sustainable future for our communities.

STUDIES AND COURSES

2009-2011

**Master of Urbanism and
Strategic Planning (MaUSP),**
KU Leuven (BE)

magna cum laude

2008-2009

**Master of Human
Settlements (MaHS), KU**
Leuven (BE)
cum laude

1998-2003

Architectural Engineering
Bandung Institute of
Technology (ID)

2007-2008

Dutch course at Embassy of
the Netherlands in Jakarta

2012-2016

Huis van het Nederlands in
Ghent and Brussels (NT2
niveau B1)

2021-present

Professional Dutch lessons

CERTIFICATION

Register van ruimtelijke planners, Departement Omgeving,
Vlaamse Overheid - Afdeling Beleidsontwikkeling en
Juridische ondersteuning (Register of spatial planners,
Department of the Environment, Flemish Government -
Policy Development and Legal Support).

SOFTWARE AND HARDWARE SKILLS

Adobe (Illustrator, InDesign, Photoshop), Sketch up
QGIS, AutoCAD, Microsoft Office, Manual modeling
(maquette) and laser cutting

WORK EXPERIENCE

2018-present	Project leader - Urbanist POLO.platform (team Stedenbouw), Brussels (BE)
2011-2017	Urban designer Architecten Achtergael , Ghent (BE)
2010-2013	Spatial researcher LATITUDE , Brussels (BE)
2009	Spatial researcher PLUS Office Architects, Brussels (BE)
2007-2008	Architect PT. Arkipuri Intranasional , Jakarta (ID)
2005-2007	Junior architect AAJ Holdings, Manama (BH)

PROJECTS

Projects at POLO.Urbanism

- CATsite Vilvoorde: urban design (layout plan for outdoor and volumetries of the building fields, and building blocks landscape design) for major scale **brownfield development** of ex-CAT site in the center of Vilvoorde Station. In collaboration with BUUR, commissioned by MG (2024-present)
- Schoolkolonie Diesterweg Kalmthout: landscape design and development strategies for the historic building complex and the park into children daycare facilities, restaurant, public parks and facilities for youth and leisure activities in Kalmthout. In collaboration with Patine (heritage expert) and Bert Breugelmans (landscape architect), commissioned by the Municipality of Kalmthout (2023-present)
- Bouwblok Volle Vaart: studies and landscape design for Volle Vaart skate park and its building block Volle Vaart in the center of Grobbendonk. In collaboration with Bert Breugelmans (landscape architect), Viro Verda (playground designer) and Skape (skate park designer), commissioned by municipality of Grobbendonk (2021-2024)
- Lierseweg Herentals: urban designer for a new housing development in a building block next to Herentals main station and Lierseweg. In collaboration with Dirk Vandekerckhove (landscape architect), commissioned by WeAreReal (2022-2023)
- Toekomstgids VITO: project responsible for the 'Strategic vision and spatial guidelines for future masterplan and development of VITO's (Flemish Institution for Technological Research) sites in Mol, commissioned by VITO (2021-2023)

- Iona Nijlen care facilities: masterplan, landscape designer and planner for development strategies for the redevelopment of Iona youth care facilities with intensive participation process, commissioned by Iona (2021-2022)
- Woonzorgcentrum Sint-Antonius Grembergen: masterplan and phasing studies for the new replacement building of elderly residential care facilities and public park of WZC Sint-Antonius, with co-creation process, commissioned by Zorg-zaam Zusters Kindsheid Jesu and Vlaams Bouwmeester (2019-2022)
- Grobbendonk and Bouwel: image quality plan and spatial vision for Grobbendonk and Bouwel, for the municipality of Grobbendonk in collaboration with Dirk Vandekerckhove (landscape architect), commissioned by Municipality of Grobbendonk (2021-2023)
- Sarens site Steenhuffel: feasibility studies for redevelopment of a former industrial area of Sarens in Steenhuffel, commissioned by Sarens (2019-...)
- Lageweg Hoboken: urban design (layout plan and volumetry studies of the building blocks) for major **scale brownfield development** in Hoboken, Antwerp, in collaboration with PTa and 1010, commissioned by DC Belgium (2019-...)
- Masterplans design for the new campus development of Medical University Campus of Hanoi and University Campus of Medical and Pharmaceutical Sciences of Ho Chi Minh City, commissioned by ADB and Vietnam Ministry of Health (2018)
- Cour et jardin, Chaussée de Bruxelles, Waterloo (Belgium): feasibility study and masterplan concept for pilot project in the city center of Waterloo (2018).

Projecten at Architecten Achtergael

- Saffrou Site Oudenaarde (Belgium): masterplan and landscape design for the redevelopment of a former textile factory into housing and neighborhood amenities, in collaboration with Omgeving (technical support landscape design) and MINT (mobility study), commissioned by Re-vive (2015 -...)
- Minerve Agfa-Gevaert IV site Edegem (Belgium): masterplan and landscape design for the redevelopment of a former industrial site into a mixed residential area, park and local services, commissioned by Re-vive (2015 -...)
- Strobbe Tuinen Izegem (Belgium): masterplan, public space and landscape design for the redevelopment of an ex-industrial area into a city square, city park, library and art academy, commissioned by City of Izegem (2017)
- Ten Rozen Aalst (Belgium): masterplan and landscape design for a residential development in Aalst. In collaboration with NERO Architects, commissioned by Huysmanbouw (2017)
- Stilleman site Asse (Belgium): masterplan and landscape design for the redevelopment of a former industrial site into a mixed residential area, office

space and commercial space, commissioned by Matexi (2016)

- Per Kornel Tupperware site Aalst (Belgium): masterplan and landscape design for redevelopment of a former industrial site into mixed residential, public functions and commercial. In collaboration with Antea (technical landscape support) and Mint (mobility study) (2011 -...)
- Onthaalsite Scheldelei Kruibeke (Belgium): landscape development of a nature reserve into an information center, office, restaurant and recreational park. In collaboration with Proap (landscape design), Stefan Schoning Studio (landscape elements) and Antea (landscape study), commissioned by Municipality of Kruibeke (2012 -...)
- Groene Have Kruibeke (Belgium): masterplan for the redevelopment of the center in Kruibeke, in collaboration with Antea (RUP) and Landschap (landscape design), commissioned by the Municipality of Kruibeke (2014 -...)
- Watersite and De Molens Vilvoorde (Belgium): masterplan design and feasibility study for the redevelopment of a former industrial area on the Zenne canal into housing, offices and commercial space, in collaboration with Bureau Bas Smets (landscape design) and Mint (study mobility), commissioned by PSR and Matexi (2011-2016)
- Rochendaal site Sint-Truiden (Belgium): masterplan design for the redevelopment of a former military site into housing and public functions, in collaboration with Atelier Kempe Thill (design masterplan), Proap (landscape design) and Mint (study mobility), commissioned by the City of Sint-Truiden (2013 -...).

Project at LATITUDE

- Floating Urbanism: In Search for New Urbanities (in the Dutch, Mekong and Amazon Deltas): a three-year research project to explore the spatial, social and technical constraints of settlements on water in relation to climate change mitigation (2010-2013).

Project at Plusoffice Architects

- Research of density and typology studies in the settlements along the Durance river valley, France- (2009).

PUBLICATIONS

- 'Banjarmasin: River and Road as Warp and Woof' in: SHANNON, Kelly, The Meulder, Bruno, Water Urbanisms East, Zurich, 2014
- RAHMANTI, Aryani Sari, PUTRI, Prathiwi Widyatmi, 'Jakarta Waterscape: From Colonial Structuring Water to 21st Century Hybrid Nature?' in: Nakhara, Journal of Environmental Design and Planning, Bangkok, 2010, pp. 59-74.

EXPOSITIONS

- 2023-2024: 'Selebrasi Lima Tahun Ibu Arsitek', an exhibition to celebrate the diverse and ever-rich journey featuring more than 300 Indonesian women architects, Dia.Lo.Gue, Jakarta (ID)
- 2011: 'Floating Urbanism: In Search of New Urbanities' (for LATITUDE), International Conference Anthropology in the World, Royal British Museum, London (UK)
- 2010: 'Exhibition Can Tho: Landscape Urbanism' (student project), Can Tho - Vietnam Urbanism Studio Master of Urbanism and Strategic Planning, KU Leuven (BE).

ORGANIZING COMMITTEE

- 2017: 'Conferences on Surabaya: Challenging Practices of Commoning and The Kampung Experience (Surabaya)' BOZAR Agora and BOZAR Architecture (co-production of Europalia Indonesia), BOZAR, Brussels (BE)
- 2016: 'Contemporary Indonesian Architecture'. ADI (Diaspora Indonesian Architects, formerly named IAI- EU), Het Nieuwe Instituut (HNI), Rotterdam (NL)
- 2014: Public lectures, conference and networking sessions (for ADI - Diaspora Indonesian Architects, formerly named IAI-EU) and Indonesia Pavilion La Biennale di Venezia 2014, Venice (IT).

RESEARCH

- Research Floating Urbanism: In Search of New Urbanities in the Dutch, Amazonian and Mekong Deltas (for LATITUDE, 2010-2013)
- Independent research 'Can Tho: Reading the Poem of the Rivers' (VN), in collaboration with Ayasha Shiddiqua, sponsored by KU Leuven - South to South Mobility Program, VLIR-UOS (2009)

TEACHING ASSIGNMENTS AND CONFERENCES

- Guest lecturer for TADA Workshop on 'Stedenbouw' with first grade students at Egied Van Broeckhoven School Molenbeek (2024)
- Citizen jury member Bruss-it Cel Stedelijk Beleid, VGC (2023)
- Studio Urbanism Banjarmasin Indonesia "River and Road Warp and Woof. Guest lecturer and jury, KU Leuven (2015)
- Guest speaker - Once Upon A Town, public lecture in ITB (Bandung Institute of Technology) (for Architecten Achtergae), ITB, Bandung, Indonesia (2012).
